Meta Ads Performance Review: Before vs. After 15 September

Oct 19, 2026 · @ModernoMilano

Since 15 September, weekly ad spend rose 37% but revenue rose only 22%. The extra spend returned €1.62 per €1, below our break-even ROAS of 1.93, so profit per week fell 15%. Last week (12–18 Oct) was the weakest week since you started.

Before vs. after 15 September

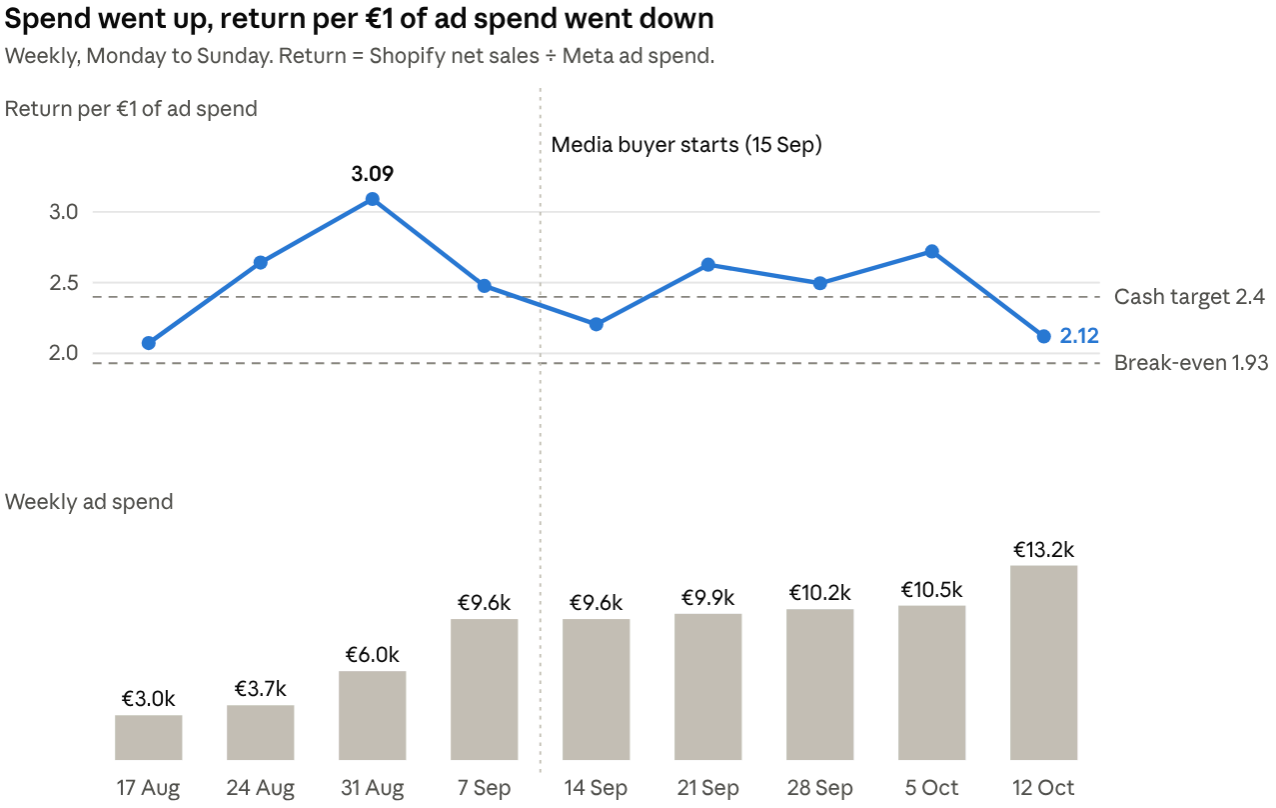

Spend grew much faster than revenue, so we earned less per week while spending more.

Per week	Before (31 Aug – 13 Sep)	After (14 Sep – 18 Oct)	Last week (12 – 18 Oct)
Ad spend	€7,797	€10,678 (+37%)	€13,195
Net sales (Shopify)	€21,161	€25,833 (+22%)	€27,971
Orders	130	144	141
Revenue per €1 ad spend (Shopify net sales ÷ spend)	2.71	2.42	2.12
ROAS reported by Meta	2.80	2.17	1.78
Profit after product costs and ads*	≈ €3,165	≈ €2,703 (−15%)	≈ €1,294 (−59%)

*Our break-even ROAS is 1.93: about €0.52 of every €1 in sales is left to pay for ads. Profit = net sales × 0.518 − ad spend, before fixed costs.

The key number: the extra €2,881 per week you added brought in only €4,672 extra sales. That is **1.62 per €1 on the extra spend**, below break-even. Every extra euro lost money.

Week by week

Meta ad spend via Windsor.ai, net sales from Shopify · weeks of 17 Aug – 12 Oct 2026

The best week was right before you started. Since then spend kept rising every week while the return per €1 drifted down, and last week it came close to break-even.

Campaign results

The six "Nasir" campaigns run just above break-even overall (ROAS 2.01), while three campaigns lost a lot of money last week. ROAS below is as reported by Meta; break-even is 1.93.

Campaign	Spend 15 Sep – 18 Oct	ROAS 15 Sep – 18 Oct	Spend last week	ROAS last week	Verdict
MODERNO WORLDWIDE TEST	€12,406	2.59	€2,501	2.29	Keep
MM | UK | SCALING | CBO	€8,818	2.06	€1,426	**1.19**	Losing money
USA CBO	€6,805	2.30	€2,135	**1.25**	Losing money, spend +48% vs. 1–7 Oct
Nasir | Worldwide | LAL	€4,985	2.23	€1,975	2.36	Keep
WORLDWIDE 2.0	€4,861	2.54	€1,425	1.95	Watch

Campaign	Spend 15 Sep – 18 Oct	ROAS 15 Sep – 18 Oct	Spend last week	ROAS last week	Verdict
Nasir | Worldwide | Retargeting	€2,800	2.04	€993	**1.33**	Losing money
Nasir | UK+IE LAL	€2,714	**1.75**	€705	**1.13**	Pause
Nasir | USA LAL (paused)	€2,247	**1.64**	€0	–	Below break-even
MM | DEU | SCALING | CBO	€1,737	**1.26**	€261	2.95	Was our best campaign (see below)
Nasir | Worldwide | Creative Test W1	€1,624	2.34	€708	2.44	Keep
Nasir | Worldwide | Reverso Set	€1,021	**1.83**	€716	**1.89**	Watch
MM | DE | TESTING | ABO	€1,034	**1.04**	€0	–	Below break-even
MM | UK | TESTING | ABO	€750	**1.33**	€0	–	Below break-even
MM | REVERSO | CBO (13–15 Oct)	€351	**0.00**	€351	**0.00**	Paused

Total of the six Nasir campaigns: €15,390 spend, €30,885 purchase value, ROAS 2.01, about €600 profit in four weeks. The other campaigns: €36,829 spend, ROAS 2.24, about €5,900 profit.

What went wrong

Four things explain most of the drop.

1. **Scaling while returns were falling.** Spend went from about €7,800 to €13,200 per week. The extra money came back at 1.62, below break-even. Last week alone, three campaigns (USA CBO, UK Scaling, Nasir UK+IE) lost about €1,600 together.
2. **Our best German campaign was almost switched off.** MM | DEU | SCALING spent €8,399 at ROAS 2.44 with 112 purchases in the five weeks before 15 Sep. After 15 Sep it got only €1,737 (ROAS 1.26) and sat at €0 for weeks. Germany is our biggest market.
3. **Too many campaigns bidding on the same people.** We now run 11 campaigns, 6 of them worldwide. They compete in the same auctions and push up each other's costs. Cost per purchase went from €79 (1–7 Oct) to €116 (12–18 Oct).
4. **New campaigns launched without a stop rule.** Nasir UK+IE LAL (1.75) and Nasir USA LAL (1.64) ran below break-even for weeks before they were cut or paused. The two Reverso launches cost €1,370 at an average ROAS of about 1.4.

Context: what is not your fault

Part of the drop comes from the market, not from your decisions.

- **Ads got more expensive.** Cost per 1,000 impressions rose from €21.80 (1–7 Oct) to €26.20 (12–18 Oct), +20%, as usual before Black Friday. Click-through rate stayed at 2.7%, so the creatives still work.
- **Fewer visitors buy.** Store conversion fell from 1.40% to 1.03% and add-to-cart from 5.4% to 4.6%. Part of this is seasonal: demand is moving from summer and Reverso sets to cashmere.
- **Five weeks is short.** New campaigns need learning time.

What is a media-buying decision: **raising spend by 37% while the extra money came back below break-even**, and letting losing campaigns run without a limit.

What we need from you, starting today

The goal is profit, not spend. **Every campaign must stay above ROAS 1.93 (Meta). The whole account must reach at least 2.4 revenue per €1 of spend (Shopify net sales ÷ spend)**, because 10% of our revenue is held as a payment reserve.

Rules

- **Spend cap:** maximum €8,000 per week (about €1,150 per day) until the account is above 2.4 for 7 days in a row. Scaling above that only after approval.
- **Stop rule:** a campaign or ad set below ROAS 1.93 after €500 spend is paused or cut by 50%. No exceptions.
- **New campaigns:** maximum €100 per day for the first 5 days, with the stop rule above.
- **Weekly report every Monday:** spend and ROAS per campaign, what you changed and why, and the plan for the coming week.

Actions this week

- [ ] Pause Nasir | UK+IE LAL Sales Campaign
- [ ] Cut USA CBO to €150 per day
- [ ] Cut MM | UK | SCALING | CBO by 30%
- [ ] Explain why MM | DEU | SCALING | CBO was reduced to €0, and bring back a Germany campaign
- [ ] Merge the 11 campaigns into 3–4: one worldwide prospecting, one Germany, one UK/US, one retargeting
- [ ] New creatives for the Cashmere Lounge Set (Beige and Black), our best sellers right now

Questions to answer in your first report

- Why was spend increased by 37% while the extra spend returned below break-even?
- Which campaigns do you want to keep, and what is your target ROAS for each?
