Meta Ads *playbook*

How we run every campaign from today on. We tested these rules on our own account. They are not suggestions. Follow them every 48 hours, with no exceptions and no gut-feeling changes.

48h	1.93	2.4	€250
ONE CYCLE	BREAK-EVEN ROAS	TARGET ROAS	CREATIVE TEST / DAY

48

The 48-hour rule. Every decision is based on the **last 48 hours**. After any change, a campaign is left alone for **48 hours**. Scaling, cutting, pausing ads and launching new creatives all happen in the same cycle.

01 · ROLES

Who does what

Owner

- Makes sure there are always enough creatives for a new batch every 48h.
- Shoots real-life videos.
- Approves anything above the €2,000 cap.

Media buyer

- Runs the ladder and the creative test every 48h, exactly as written.
- Asks for new creatives in time, before the test runs dry.
- Reports after every cycle.

02 · BUDGET

The scaling ladder

ROAS 4.0 +	+100%	Double the budget straight away.
3.0 – 3.99	+50%	Strong. Scale up hard.
2.4 – 2.99	+20%	Profitable. Scale up step by step.
1.93 – 2.39	Hold	Break-even zone. Don't touch it. Check again in 48h.
1.0 – 1.92	–20%	Losing money. Cut back.
Below 1.0	–50%	Heavy loss. Halve the budget.

↑ SCALE UP CAMPAIGN ROAS · LAST 48 HOURS · CAMPAIGN (CBO) BUDGET SCALE DOWN ↓

Minimum data
Under €100 spend in 48h means no verdict. Leave it running for another 48h. €100+ spend with 0 purchases counts as ROAS 0.

One change per 48h
Each campaign gets one budget change per cycle. After that change, the 48-hour clock starts again.

Budget cap: €2,000 / day
Total daily spend across the account never goes above €2,000 without written approval from the owner.

Below 1.0 twice in a row
Halve the budget again and flag it in the report. The owner decides if the campaign is switched off.

03 · CREATIVES

Creative testing: always have winners ready

The Creative Test campaign runs at **€250 per day**, so every ad gets enough spend for a real verdict. Every 48 hours one batch comes in and the winners move out.

1	2	3	4
Judge	**Cut**	**Promote**	**Launch**
Score every ad in the test campaign on its numbers from the last 48 hours.	Switch the losers off.	Move the winners into the scaling campaigns using their Post ID, then switch them off in the test campaign.	Add the new batch. The budget now goes to the fresh creatives.

WINNER

2+ purchases and ROAS 2.4+

Move it to scaling via Post ID, so likes and comments carry over.

LOSER

€150 spent, 0 sales or €300 spent at ROAS < 1.5

Switch it off right away. Don't give it a second chance.

NOT CLEAR YET

Neither winner nor loser

Leave it running for one more 48h cycle.

04 · ROUTINE

The 48-hour checklist

1. **Same moment, every cycle.** Open Ads Manager and set the date range to the last 48 hours.
2. **Campaigns.** Put every campaign on the ladder: scale up, hold or scale down.
3. **Cap check.** Make sure the total daily budget stays at or under €2,000.
4. **Scaling ads.** Inside the scaling campaigns, switch off ads that hit the loser rule.
5. **Creative test.** Judge, cut and promote, then launch the new batch.
6. **Report.** Send the owner the update below within one hour.

Report to the owner, after every cycle

Scaled up · campaign, old → new budget, ROAS

Scaled down · campaign, old → new budget, ROAS

Ads off · name, spend, purchases

New winners · moved to which campaign

New batch · how many creatives went live

Totals · daily budget, 48h spend and ROAS

Flags · anything below 1.0 twice in a row, a cap breach, or creatives running out
